KnockoutJS

jQuery

VueJS

Express

Profile

I am a front end developer that loves working with new technologies. I write concise, easily understandable and easily extensible code. I know the balance between doing things correctly and doing things quickly, while also adhering to YAGNI principles.

I would like to work with a team that has a clear product vision, a culture of inclusivity with developers, and prefers to create streamlined applications that leverage modern Javascript frameworks and libraries(Vue and Node/Express preferably).

Employment History

Senior Front End Web Developer, ThriveHive

Aug 2014 - Present 📍 Boston, MA

Leading a team of developers using Agile methodology to build new frontend applications and microservices. Helping to onboard and facilitate the growth of junior team members.

Financial Solutions Advisor, Bank of America/Merrill Lynch

May 2006 - Apr 2014 📍 Cambridge, MA

Provided holistic retirement, education, and general investment advice to bank clients. I was promoted to 7 different roles during this period.

Education

General Assembly Web Development Immersive

Apr 2014 - Jul 2014 📍 Boston, MA

12 week full time program learning full stack web development. Learned Ruby, Rails, Javascript, AngularJS, D3, CSS/HTML5, Git, PostgreSQL, RSpec, Jasmine.

Bentley University, BS Finance Minor: CIS

Aug 2006 - May 2010 📍 Waltham, MA

Core Finance curriculum with focus on fixed income and securities valuation, real estate management, and computer information services.
